Project Description

Principal's Priority

2

Purchase and install 15 Interactive White Boards and associated assessment devices. This will enable several teachers on each team to have the opportunity of using this technology to motivate and support their classroom teaching. Although Hanshew has interested and trained teachers, we have been unable to fund new technology to use in the classrooms. This would allow teachers to assess student understanding in a very effective manner leading to more effective teaching strategies. It allows for many new aspects of presentation, learning, and formative assessment to take place in the classroom, which in turn becomes very motivating and exciting for learners.

Benefits if Project is Funded

Bringing this technology into the class will increase both motivation and participation. The concept of student buy-in and automatic feedback creates enormous potential for efficiency, participation, and forward movement in curriculum. Having access to technology such as interactive whiteboards will increase participation for both in class assignments and homework. It is needed for preparing students for the 21st Century.

Impacts if Project is not Funded

of Students impacted by project 850

Project Start Year 2011
Project Finish Year 2011

Project has matching funds are available
Project has prior state funding available
No
Project has federal funding available
No
